Hi Charles,

Thanks for your helpful comments Charles. I am glad the draft exceeded your expectations. We reviewed and addressed your comments in the attached drafts, one with track changes and a clean version.

The one comment we couldn't address in short order is the example you suggested including about a rulemaking driving innovation. We are working with our lighting team (Mike M and others) on some language to include for an example of high margin products becoming the industry standards due to regulations.

Let me know if you have any questions about this updated letter (noted as V2 0).

Thanks,
Bijit

Dear Bijit,

My comments are attached. Would you please let me know if my comments make sense to you ASAP (especially the sentence that contains "108 percent")?

If you are O.K. with my comments, can you send a cleaner version ASAP so that I can take steps to get approvals?

Thank you.

P.S. This comment letter is far better than I expected. Thank you.

Attached is the draft comment letter on the DOE RFI. I appreciate everyone's time to get the outline done, this is a pretty meaty letter. Please review and send Bijit and I your comments by COB July 10, 2017. We will revise the letter and get it back to the team by July 12th for final approval. If you have any questions please let me know. Thanks!!!

Mary
