NRDC-1	MCE	Res	Metrics (tracker)	<ul style="list-style-type: none"> • NRDC looks forward to seeing more market characterization and citations/descriptions of barriers, EM&V summaries, etc. • Metrics – <ul style="list-style-type: none"> ○ I appreciate the metrics for each barrier, but I don’t see the connection to measuring progress toward the desired outcome (e.g., MF #1 – How do you measure the outcome of EE becoming the norm?) ○ With all the various financing programs and pilots, will the intervention strategy to make new financing programs be duplicative? ○ With all the certification, ratings, etc., will it be duplicative or increase confusion in the market to also do a residential certification program? ○ The SPOC first intervention appears to be adding more program options to the SPOC program, but then the metric is about referrals. Please clarify. ○ For “Home information and automation devices to make energy consumption more conspicuous” it is unclear how the metric is an increase in value of EE during resale. How does the strategy translate to increased value in resale?
