

Comment #	PA(s)	Sector	Page #	Comment
NRDC-1	PG&E	Com	General (no tracker)	<ul style="list-style-type: none"> <li>• Include income information per zip code if available</li> <li>• Include rent vs. owner if available</li> <li>• Include examples for “other” (p.2, 14) – the definition on p.9 doesn’t help b/c it’s unclear where nail salons, gyms, auto, hotels, etc. go. Perhaps include examples of what is included in your categorizations (e.g., retail usually includes clothing, furniture, etc. but perhaps nail salons are there?)</li> <li>• P.4 – similar to res chapter rec, suggest putting these goals into a table with strategies to help the reader see how they align.</li> <li>• P.5 – suggest linking to the 793 AL</li> <li>• P.9 – has retail 2 times in the description of the % of usage (just above the graphs)</li> <li>• P.12 you reference residential after the data table (presume you mean commercial)</li> <li>• P.18 –             <ul style="list-style-type: none"> <li>○ suggest adding technical assistance to 4<sup>th</sup> barrier intervention</li> <li>○ suggest adding financial to 5<sup>th</sup> barrier intervention</li> <li>○ suggest adding data to last barrier intervention</li> </ul> </li> <li>• p.20 – FYI, interventions 1-3 just say “intervention”. 4 says “intervention strategy” (which is the way the other chapters title it) and 5 says “intervention” again.</li> <li>• p.33 – I think you mean “bottom-up” instead of “bottoms-up”</li> <li>• p.34 – you reference TMTI for an industrial upstream initiative. Should it be commercial or did you mean joint?</li> <li>• P.34 – presume this will change given the SW assignments. What would PG&amp;E do? (or does this now go to the SW descriptions instead of here)?</li> <li>• P.43 – suggest adding SB 32</li> <li>• P.45 – describe how PG&amp;E will collaborate with MCE/BayREN. Meetings? Cross referrals? Other?</li> <li>• P.78 – is the TMTI table not being proposed/included for the res sector due to PG&amp;E’s assumption that efforts are better spent elsewhere?</li> </ul>
