**33.** Was past program participation by service territory considered in determining statewide assignments?

**SDG&E Response:**

Yes. As described in the jointly filed “Statewide Administrative Approach” whitepaper, the utilities were guided by the following criteria to determine statewide assignments: portfolio approach and natural bundling, cost-effectiveness, capacity, expertise, relationships, and feedback from stakeholders. Past program participation was considered as part of the cost-effectiveness and expertise evaluation. In addition to past program participation, the utilities also took into account the forward looking vision that various utilities had regarding particular statewide programs.
