

*Southern California Edison*  
**SCE EE Business Plan A.17-01-013**

**DATA REQUEST SET A.17-01-013-ORA-SCE-001**

**To:** ORA  
**Prepared by:** Matt Evans  
**Title:** Senior Manager  
**Dated:** 03/01/2017

---

**Question 07:**

Please provide a list of all activities, including administration and support, proposed in your business plan that will not be bid out in compliance with the third-party definition in D.16-08-019.

**Response to Question 07:**

SCE anticipates performing solicitations for nearly all program implementation activities during the timeframe covered by its Business Plan. However, because SCE has not yet received Commission decision on its Business Plan, and has not yet executed any of its solicitations, it currently does not know which programs and services will be proposed by third parties, nor can it identify specific implementation activities that it will continue to perform.

SCE currently expects that the work its staff performs will shift from program operations to more contract management as a result of increased third-party EE implementation as required by D.16-08-019. In addition, SCE will need to continue to execute other support functions to manage compliance, verify energy savings, and achieve customer satisfaction. SCE does not anticipate that the administration and support functions will be bid out as these functions are likely to be performed by SCE. These functions include, but may not be limited to:

1. Contract management
2. Regulatory reporting and filing development
3. Compliance oversight and tracking
4. Portfolio planning and optimization
5. Integrated DSM/DER planning
6. Evaluation, measurement, and verification
7. Engineering QA/QC reviews
8. Billing and program data mining, provisioning, and analysis
9. Audits
