Instructions: **Please make comments specific, reference pages where appropriate, and be focused on Business Plan level strategies.**

**Commenter: Please Fill In This Part Of The Form**

Comment #	PA(s)	Sector	Page #	Comment
CPUC-Hardy-1	SDGE	Industrial	General	<ul style="list-style-type: none"><li>• Overall, a good chapter. Clear, well written, informative.</li></ul>
CPUC-Hardy -2	SDGE	Industrial	121	<ul style="list-style-type: none"><li>• Metrics table: sector metric is month by month growth in projects but with targets measured in years. I am not a metrics person but this looks very granular at the metric level. Also, would like to see this by segment/size. In addition, a metric showing increase in industrial-process focused projects as opposed to the commercial measures routinely offered in the past, by size and maybe segment. The comparison of savings from SEM participants to non-SEM-participants – is this really a metric as opposed to some kind of evaluation? The third item has no metrics.</li><li>• Do not see metrics tied to goal of doubling savings.</li></ul>

CPUC-Hardy-3	<b>SDGE</b>	Industrial	123	<ul style="list-style-type: none"><li>• EMV Considerations: SDGE appears to be of the view that whole building, top down, NMEC measurement applies to industrial projects. This is the case for building-related projects per D. 16-08-019, but is not the default for custom calculated projects.</li></ul>
