Hi Mary,

I've conferenced internally and it looks like SoCalGas is continuing with our original course of action – filing comments that reiterate that we have not received any resolution from the DOE on the issues we addressed to the NOPR. Our second piece will be to notify that our threshold for the smaller furnace size needs to be 65 KBtu/h.

Let me know if you still want to hold the call but I suspect that PG&E is not going to raise their threshold level to 65 KBtu/h, which would put us at odds for our responses.

Thanks!

Sue Kristjansson
