

Comment #	PA(s)	Sector	Page #	Comment
NRDC-1	SCG	Res	General (no tracker)	<ul style="list-style-type: none"> • Provide an overarching table of contents to find chapters more easily. • Add citations as a number of items are assertions without references (e.g., p.6, 12, 15-16, 17-18, etc.) • P.5 – what makes a “proven program strategy”? EMV? Savings over time? Etc.? • P.5 – seems like the main difference from past cycles is the use of AMI data. Are there other changes? • Table A.2 seems to include existing items as well • Include end use information info to understand where the usage is (e.g., SDG&E p.49-51) • Add MF/SF rent vs. own (see PG&E market characterization p.9-10) • Expand the discussion of climate zones with similar mapping and data like PG&E p.13 • P.9 what is Misc. for Figure 1.5? – also add % • Add a discussion of potential (e.g., SDG&E p.49-51) • p.13 – what is “ultra-high” levels of EE? • p.14 – tactical objectives (which I think are the equivalent of other PA tactics?) are hard to match. Would suggest removing and making a one clear table with goal, strategy, tactic • There is a lot of good information in the plan, but it is a challenge to follow the flow from barrier to goal to strategy. Consider reorganizing as I think all of the information is there, but the multiple tables makes it a bit of challenge to follow the flow. • P.15-16 problem statements don’t match with the p.20 problem statement • P.20 – table has 3 desired outcomes, but p.13 has 4 goals; why is the 4th on p.19 instead? • Could combine a number of the tables to make it easier for the reader to follow and likely pare down some of the language to get the main point across
NRDC – 2	SCG	Res	Metrics (no tracker)	<ul style="list-style-type: none"> • Will need to separate SF and MF metrics to be able to track them separately. #2 likely needs to have a 2a and 2b.
