Hi Sue,

Yes. We need to meet with our CA delegation members and especially with Cardenas (D-CA) who is on Energy & Commerce.

Thanks

Sean

That makes sense.

So, are we planning to lobby as a company? I thought we were going to leave that to the AGA to do on our behalf? If we are planning to take an active role in lobbying then we can put together a basic position for that purpose with early analysis that I can probably get by Friday. We can continue with the deeper dive that will inform a response to the rule if we choose to submit one. Let me know and I can shift the deadlines we've given the consultants.

Thanks!

Scott and Bret had a call today on a whole bunch of different things that we are working on. This was probably an aside to the conversation.

No worries Scott Crider is VP federal affairs for Sempra. Head of the DC office. Tim is my colleague a government affairs manager here in dc. Bret/Rodger are confused. Tim's not involved. It was definitely Scott and it's not for new data.

Sorry, still getting to know the players, who is Scott? Rodger mentions someone named Tim.

Scott was referring to the need for the all ready occurring analysis of the rule's impact on SoCalGas. We need for our lobbying efforts on the hill. Not a different request for data. I think he was expressing that we have a very short window of time to get this in the energy bill and that time is of the essence.

Hi Sean, do you know anything about the request from DC office that Rodger references below?

Ok. He thought it Tim Randsdell asking for the information.

I'm not familiar with that request. I received a data request (SOS) from the AGA that I am preparing but not from our DC office. I will check with Sean Mackay and see if he is aware of it and if he can give me some additional information.
