Subject: Notice to Parties in R.13-11-005 Regarding June 14 Energy Efficiency Business Plan Metrics Workshop

To all parties in R.13-11-005, from Hazlyn Fortune, Supervisor, Energy Efficiency:

At the end of the Business Plan Metrics "conversation" hosted by ED Staff on May 26, I promised to send you information about the next conversations scheduled to occur prior to the PAs' submittal of their revised set of metrics.

The Commission has proposed common metrics for key sectors and programmatic areas. In the May 26 conversation, ED staff presented the proposed common metrics and documented specific and general feedback from Program Administrator (PA) Parties and others about the proposed and potential new common metrics.

The next "conversations" on June 14 and a future date (TBD) will be hosted by CAEECC in an Ad Hoc process and will focus on the proposed ED common metrics with the following objectives:

1. To identify common metrics where there is consensus.
2. To identify what efforts will be required of the PA Parties to comply with Energy Divisions' proposed common metrics.
3. To provide all Parties with an opportunity to suggest alternative metrics that enable the Commission and PAs to communicate EE portfolio achievements internally and externally.

After the next two conversations ED staff will meet internally to discuss whether updates to the initially proposed common metrics are warranted. Any updates will be communicated prior to the current or revised due date for filing revised EE Business Plan metrics.

Hazlyn Fortune – Supervisor, Energy Division
