

Comment #	PA(s)	Sector	Page #	Comment
1	SDG&E	Commercial	All	<ul style="list-style-type: none"> The approach presented for the commercial section seems to stand out from the other business plans.
2	SDG&E	Commercial	12	<ul style="list-style-type: none"> The outsourcing strategy presented here for third party programs to achieve the 60% threshold by 2020 as required in D.16-08-019, is a great start. However, what type of programs will meet these requirements, offering innovation and new technologies. How will SDG&E seek new EE programs in 2017?
3	SDG&E	Commercial	41	<ul style="list-style-type: none"> One of the barriers for customers is the project implementation process, which can be long and complicated with policy changes in the middle of the process. Customers seeking more than one contractor on a project may present challenges and become more cumbersome for customers without technical experience- this would be an Aptitudinal barrier. More thought about how to assist customers and streamline the process would be beneficial.
4	SDG&E	Commercial	62	<ul style="list-style-type: none"> Metrics- are good and informative but no idea of term target?
5	SCG	Commercial	All	<ul style="list-style-type: none"> Need sector chapters included in TOC.
6	SCG	Commercial	9	<ul style="list-style-type: none"> Budgets & Cost-Effectiveness- All TBD from 2018-2028. No estimates of savings.
7	SCG	Commercial	10	<ul style="list-style-type: none"> Need better understanding of Intervention Strategies.
8	SCG	Commercial	All	<ul style="list-style-type: none"> Very high level commercial chapter.
9	SCG	Commercial	34	<ul style="list-style-type: none"> Observation: This is a very short paragraph on Third Party implementation. More information on how SCG will meet CPUC guidance for third party programs based on D.16-08-019. Table F.1: Program Solicitation Schedule- all TBD (very high level)
10	SCG	Commercial	41	<ul style="list-style-type: none"> Sector Metric table (appendix A)- the only metric source is program tracking data. How about looking at additional sources for this sector.
11	SCE	Commercial	17	<ul style="list-style-type: none"> Table 2- would like to see Commercial Sector Savings Goals (all TBD).
12	SCE	Commercial	18	<ul style="list-style-type: none"> Strategic initiatives for customers could include- as stated on pg. 18- customers that qualify should be eligible for a host of additional programs.
13	SCE	Commercial	21	<ul style="list-style-type: none"> Table 5- good problem statements/desired outcome strategies and metrics- now to connect the source to term targets
14	SCE	Commercial	22	<ul style="list-style-type: none"> Would like additional information and a description of the effort to expand pilot programs and partner with other stakeholders (?).
15	SCE	Commercial		<ul style="list-style-type: none"> Did not find any reference to meeting new third party CPUC guidelines

16	SCE	Commercial	25	<ul style="list-style-type: none">• Pilots that are applicable to both commercial and industrial sector would promote consistency.
17	SCE	Commercial	26	<ul style="list-style-type: none">• The customer care package is a great idea – needs better branding.
18	PG&E	Commercial	4	<ul style="list-style-type: none">• It will be great to see the numbers for the sector goals
19	PG&E	Commercial	6	<ul style="list-style-type: none">• The intervention strategies have a sound approach.
20	PG&E	Commercial	All	<ul style="list-style-type: none">• Some of the sections do not provide are high level without much detail. Very general with good concepts but not much information.
21	PG&E	Commercial	11	<ul style="list-style-type: none">• Table 4 and 5 provide relevant information about customers
