Marc and Bo,

I just met with Sue and got some feedback on how to move forward with the DOE RFI. First, can you compare the IOU comment letter and APGA's, attached, please ensure that it is not shared elsewhere. This is a draft and only for the purpose of understanding the issues at a broader level in the industry.

Second, we would like to draft our own comment letter. She does feel we should add the LCC comment in and incorporate the points from both that we see necessary and also support any comments we have made in the past.

- 1) APGA doc
- 2) IOU Negawatt edits
- 3) IOU SoCalGas edits (just pull Adam's changed from section Energy Efficiency Regulation Impacts: States and Utilities on page 2

Please let me know your thoughts and if you have any questions.

Thank You,

Daniela Garcia

Great, thank you and Adam had some comments in the Energy Efficiency Regulation Impacts: States and Utilities Section so I just sent that off. Once I receive a clean version I will send back around. I plan to send for Sue's approval at that time as well and bring up the LCC comment.

Daniela,

please find attached our updates to the latest letter. Bo made some changes for clarity & formatting, and suggested a few more for others to address. Most importantly, Bo had the good idea to insert more verbatim language from the EPCA, to remind them in stronger (and legal) terms of their obligations. Let me know what you think. Changes tracked.

Marc

Thanks Marc, I am waiting on some guidance from Sue for the points below ☺ I will try and get an answer by end of week.

Thanks!

ok, Bo will work my #1 into the latest letter for us, and also give it another good look otherwise. We'll get back to you with updates.

Re LCC, we would file a separate letter in addition to signing on the joint letter, right? I am all for that. IMHO the LCC continues to be the best way to establish the cost/benefit, the details just need to be improved.

Pending Sue

Did any points from AGA or APGA surface that we need to consider? **Pending Sue**

Thanks

Marc,

Attached is the latest version. They did take out the LCC comment which I am pending guidance on whether that puts us in a position where we would file separately. For your item #1 I think we just hadn't brought it up on the call. Can you add in this version of the letter and we can send around to see other's thoughts.

Thanks!

Dear Bijit,

My comments are attached. Would you please let me know if my comments make sense to you ASAP (especially the sentence that contains "108 percent")?

If you are O.K. with my comments, can you send a cleaner version ASAP so that I can take steps to get approvals?

Thank you.

P.S. This comment letter is far better than I expected. Thank you.

Attached is the draft comment letter on the DOE RFI. I appreciate everyone's time to get the outline done, this is a pretty meaty letter. Please review and send Bijit and I your comments by COB July 10, 2017. We will revise the letter and get it back to the team by July 12th for final approval. If you have any questions please let me know. Thanks!!!

Mary
