CEE DATA REQUEST SET TWO (QUESTIONS 38 – 47)

44. Response to Data Request 23 states that the Business Plan presents the “IOU’s overall, holistic approach to the DVC recommendations.”
- a. Please explain in detail what this “approach” is and how it addresses the UC- Berkeley Don Vial Center Workforce Guidance Plan recommendations. Please identify by page number and paragraph where the Business Plan presents this approach.
 - b. Your response states that the approach in the Business plan is consistent with the direction provided by the CAEECC process. Please describe the “direction” provided by the CAEECC process, who specifically provided this direction and when and how this direction was provided.

SDG&E Response:

44(a): The purpose of SDG&E’s business plan was to chart a course towards achieving zero net energy and doubling EE, including the goals, strategies and sample tactics to do so. As such, it focuses on sector business plans and not point by point responses to individual studies (i.e. holistic). Please see the various citations to the DVC recommendations, along with numerous other studies, which informed the development of the business plan. Examples can be found in SDG&E’s business plan: Footnote 16 (p.48); Footnote 18 (p.86); Footnote 2 (p.189); Footnote 17 (p.83); Footnote 3 (p.189); etc.

44(b): SDG&E reaffirms its response to Question 23 from CEE’s initial data request, in which it described the process by which it vetted its approach to WE&T set forth in its business plan. The response is as follows:

At the September 23, 2015 Statewide WE&T Stakeholder Engagement Forum (SEF) the IOUs presented an update on how D.15-10-028 adoption of the Rolling Portfolio Business Plan would affect long term planning within WE&T. During the “Rolling Portfolio & Long Term Planning”

section of the SEF, the IOUs presented changes in the approach to long term planning based on the Rolling Portfolio and identified the WE&T team priorities going forward. At that time, the IOUs requested feedback from stakeholders to provide input on priorities going forward.

During 2016, WE&T Rolling Portfolio Business Plan Subcommittee meetings were held. These meetings were noticed respectively to the EE, DR and DG service lists and CAEECC. At the subcommittee meetings, the IOUs presented their plans to Stakeholders, discussing the Barriers, Problem Statements and Gap Analyses sections of the Business Plan. These sections considered the various evaluations, studies and reports the IOUs have received, including the DVC studies. In response to a specific stakeholder question about the DVC report (at the May 3, 2016 meeting) the IOUs stated that those recommendations in whole were being taken into consideration as part of the Rolling Portfolio Business Planning.

In sum, at the direction of the CAEECC facilitation team, SDG&E participated in discussions and presentations for stage 1, stage 2, draft business plan submission and response to stakeholder feedback via the CAEECC input tracker. SDG&E's full participation, including presentations, drafts, agendas and meeting minutes is documented here: <https://www.caeccc.org/>.
