

Southern California Edison
SCE EE Business Plan A.17-01-013

DATA REQUEST SET A.17-01-013-ORA-SCE-001

To: ORA

Prepared by: Ryan Bullard

Title: Project

Manager

Dated: 03/01/2017

Question 03:

How did specific state goals and objectives – such as those in SB 350, AB 802, and the Energy Efficiency Strategic Plan – inform your analysis in setting short, medium and long term success targets?

Response to Question 03:

Please refer to SCE's response to Question 2 for more information about how SCE established targets for the metrics in its Amended Business Plan. Specific state goals and objectives, such as those in SB 350, AB 802, and the EE Strategic Plan, did not directly inform SCE's development of its metrics targets. However, these policies did inform SCE's selection of intervention strategies and sector-level metrics for its portfolio.

In addition, SCE's annual savings targets are based on the goals established in D.15-10-028, which was issued within three weeks of the passage of SB 350. Therefore, SCE's current savings targets do not incorporate the doubling of EE required by SB 350. It is SCE's understanding that the CPUC will establish, through the Demand Analysis Working Group (DAWG) process, EE goals for 2018-2030 that define each IOUs' contributions toward SB 350 savings goals. As these goals are developed and adopted, SCE will update its energy savings goals and budgets as necessary.
