I think incremental improvements are very effective... the only time I'd be hesitant is if an early version not being perfect makes someone look bad. If you don't think we have that problem here, Daniela, then I'd say send it.

Hi Daniela,

The attachment is missing in your first email in this thread. I agree with Marc that we should get Mary's (and Ed's) comments in writing. Aside from perhaps seeing the small edits in the missing attachment, I think the test plan is ready for IOU review.

Thanks,
Bo

Yeah we will need her written suggestions, I agree. I did inform them we would have a draft for them today so I would like to get that out once I get the confirmation form you both.

Thanks!

Mary's ideas differ from ours in some ways for sure. I would prefer to see her suggestions in writing though instead of trying to paraphrase what she said.

Either way we will need more details about the rest cases at some point, and, we could review asme 18.1 re water chemistry.

Bo, thoughts?

Small edits attached. With the discussion we had yesterday are there any changes that should be made prior to distributing?
