SCE EE Business Plan A.17-01-013

DATA REQUEST SET A.17-01-013-CEE-SCE-002

To: CEE

Prepared by: Joni Key

Title: Project Manager

Dated: 05/18/2017

Question 44d:

The responses to Data Request Questions 16, 17 and 18 state that the “risk factors for degradation of the performance of energy efficiency (EE) measures are factored into the installation rates found in workpapers ... and subsequently updated in DEER as Gross Savings Installation Adjustments (GSIA). Energy savings (with deductions for installation rates) are one input into cost-effectiveness calculations, so these installation rate reductions are reflected in cost effectiveness calculations as well.”

d. For each measure identified in response to part (b) of this question, identify the ex ante review dispositions, energy efficiency measure work papers or other specific documents that provide the basis for the discount attributable to the risk of lost energy savings due to poorly installed measures, and identify where in each document this information is contained (by page number and paragraph).

Response to Question 44d:

Not Applicable.
