Marshall,

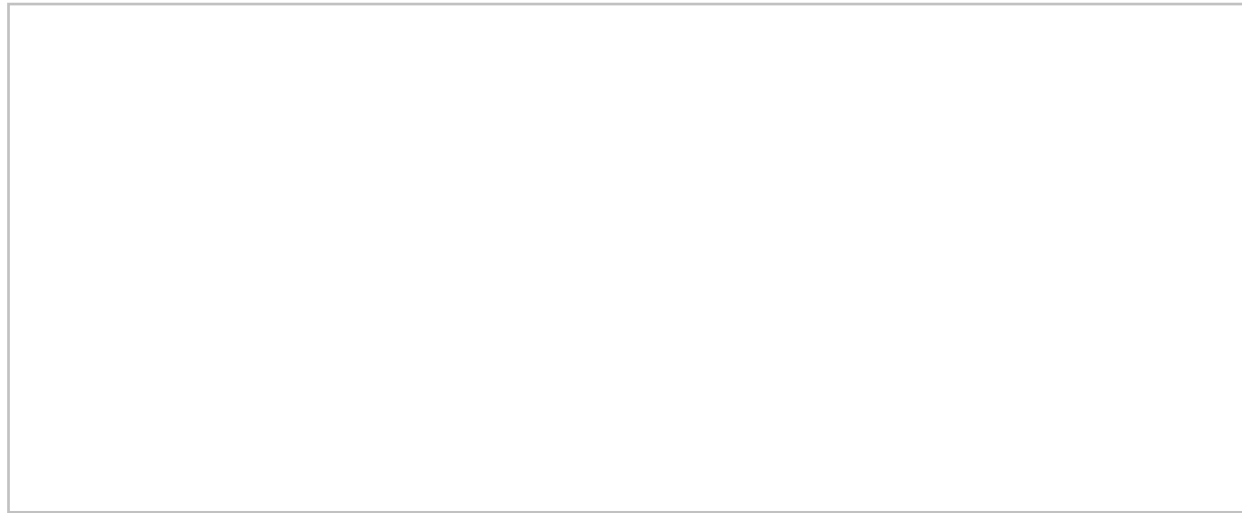

I will leave the meeting 15 minutes early for another appointment.

Marshall,

Farhad helped me to develop the following HDD chart by CA climate zone. Only climate zone 1&16 have HDD>3000, so we don't want a regional standards based on this threshold. The option of allowing Title 24 to set different standards based on CA climate zone is worth to explore. It essentially provide a pre-emption waive and it could be a model for other appliance needs pre-emption waive.
